#### 6. Remarks and Other Relevant Information:

Owner intends to convert the berry growing operation from spray irrigation to drip irrigation making the use of water significantly more efficient. The request is to allow the use of the conserved water on an additional 78.06 acres on properties adjacent to the current irrigated berry fields.

Attached documentation demonstrates that the conversion to drip irrigation methods will conserve approximately 50% of the water used under spray irrigation. This amounts to 35 acre feet of water per year of the water allocated under Certificate G2-09219C. the remainder being surplus gained from the owners other irrigation right G2-21724

Using the current drip irrigation demand per acre, the conserved water would be sufficient for irrigation of an additional 35 acres without expansion of the allocated water under water right G2-09219C

IF FOR SEASONAL OR TEMPORARY, START DATE 04/15/ END DATE 10/15/
